ABSTRACT

The series in which the Office of Education presents general management data on the libraries of individual institutions, is continued by this report. The report contains statistics for 1,841 college and university libraries and seven joint libraries in order to provide data of use to administrators, librarians, and others, particularly in budget-making operations. Since this is a partial listing of all academic libraries, with inclusion based on both the timely submittal of a report and its completeness, it cannot be assumed as representative for obtaining aggregates of any type. The tables included are: (1) "Number of Units in Library Collections and Interlibrary Transactions in College and University Libraries, by State and Institution: 1967-68;" (2) "Actual Operating Expenditures of College and University Libraries, by State and Institution: 1967-68;" (3) "Budgeted Operating Expenditures of College and University Libraries, by State and Institution: 1968-69;" (4) "Library Staff and Hours of Assistance in College and University Libraries, by State and Institution: Fall Term 1968;" and (5) "Number and Average Salary of Full-Time Staff in College and University Libraries, by Type of Position, Term of Employment, State, and Institution: Fall Term 1968." A reproduction of the questionnaire form used is appended. (Author/NH)

FOREWORD

This report continues the series in which the Office of Education presents general management data on the libraries of individual institutions of higher education. In order to provide timely data of maximum use to administrators, librarians, and others, particularly in budget-making operations, this report, containing statistics for 1,841 college and university libraries and 7 joint libraries, is now being issued. An abbreviated listing of 395 institutions, so selected as to provide a cross-section of academic libraries, was issued in December 1967 to meet the urgent need expressed by academic librarians for institutional data, but its utility was not universal.

Inasmuch as this is a partial listing of all academic libraries, with inclusion based on timely submittal of a report and its completeness, the user is cautioned against attempting to assume its representativeness by obtaining aggregates of any type. A second report containing summary tables for all academic libraries will be published at a later date.

The information contained in this report was collected as part of the Higher Education General Information Survey. The cooperation of numerous individuals and groups concerned with academic library statistics made this publication possible. Their assistance is greatly appreciated by the U.S. Office of Education.

3. Budgeted Operating Expenditures of College and University Libraries, by State and Institution: 1968-69	69
4. Library Staff and Hours of Assistance in College and University Libraries, by State and Institution: Fall Term 1968	101
5. Number and Average Salary of Full-Time Staff in College and University Libraries, by Type of Position, Term of Employment, State, and Institution: Fall Term 1968	133
<u>APPENDIX</u>	
Reproduction of Questionnaire Form	169

INTRODUCTION

This report contains statistics on college and university library collections, inter-library transactions, and operating expenditures for the 1967-68 school year, as well as budgeted expenditures for the 1968-69 school year and a total staff count and salaries, by type of position, for the fall term 1968. These data are shown for 1,841 individual academic libraries and 7 joint libraries which returned acceptable reports by November 1968. Many college and university libraries submitted reports during this period which, after examination, could not be included in the processing operations for this report. However, after resolution of the problems, they will be incorporated into the data file for future tabulations and analysis.

For purposes of reporting library statistics, each institution of higher education was asked to consolidate the data for all of its library units, including libraries in branches and extension centers. If an institution returned separate reports for components within its library system, the data were combined into a single report. However, the number of libraries and the number of institutions do not precisely coincide because in six cases two or more institutions are served by the same library; e.g., in California, the Honnold Joint Library serves the Claremont Graduate School and University Center, Claremont Men's College, Harvey Mudd College, Pitzer College, Pomona College, and Scripps College. The seventh joint library serves one institution and a branch of another. In all instances, the member institutions are shown in the table with a cross-reference to the appropriate joint library.

Tables and definitions

In Tables 1 through 4, institutions are listed alphabetically within each State; "U.S. Service Schools" and institutions in outlying areas are grouped at the end of each table. Each institution is identified by control (public or private) and type of institution, as follows:

- U -- University
- FG -- Four-year institution with graduate program
- FN -- Four-year institution, no graduate program
- T -- Two-year institution.

Table 5, which contains salary data for the full-time library staff and the beginning salary that the library is paying to a library school graduate with no prior experience, has been structured differently from the other tables. One, two, or three lines may be shown for each institution depending upon whether the term of employment of the staff member is 9-10 months, 11-12 months, or contributed services (C.S.).

In all tables, brackets in the margin show the groups of institutions that make up a college or university system.

Publicly controlled institutions are those administered by local or State governments, as well as a few in which full administrative control is by the Federal Government. All other institutions, including religious or theological, independent nonprofit, and a few proprietary schools, are classified as privately controlled.

Institutions are classified as universities if they (a) give considerable stress to graduate instruction, (b) confer advanced degrees as well as bachelor's degrees in a variety of liberal arts fields, and (c) have at least two professional schools that are not exclusively technological. The definition is the same as the one utilized in previous reports in this series.

Four-year institutions other than universities are not subdivided (as in earlier reports) into specialized schools or colleges, such as liberal arts colleges, teachers colleges, technological schools, etc. These categories have become less and less distinct and more difficult to delineate as the institutions broaden their curriculums. Thus, the old classification tends to become arbitrary. From the standpoint of library administration, it seems sounder to use a two-way breakdown, namely, the institutions which do, and those which do not, have graduate programs, that is, programs of academic work beyond the baccalaureate or first-professional level.

Two-year institutions are those offering programs of at least two, but less than four, years of college-level work. This definition is also the same as the one previously employed and is synonymous with the term "junior college" or "community college."

For purposes of estimating an institution's full-time equivalence of enrollment, use was made of the total number of graduate students plus all full-time resident undergraduates plus one-third of the part-time resident and extension students. This method was also used for the Fall 1967 report but is not exactly comparable with that used in prior years. However, within this publication, the figure is comparable from one institution to another.

Volumes are defined as physical units of any printed, typewritten, hand-written, mimeographed, or processed work contained in one binding or portfolio, hardbound or paperbound, which had been classified, cataloged, or otherwise prepared for use. Thus, the volume count includes bound periodicals and cataloged Government documents, but excludes all microform. The latter was obtained separately, as a count of microfilm reels plus the number of physical units of other forms of microtext (microcards, microprints, and microfiche units).

Periodicals are defined as publications issued in parts that usually contain articles by several contributors; they generally have distinctive titles, and the successive numbers or parts are intended to appear at stated intervals, usually for an indefinite period. Periodicals are thus distinguished from such other serials as monographs, newspapers, annuals, proceedings, transactions, yearbooks, and recurring reports.

Interlibrary transactions involve loans of library materials by one library to another. Separate statistics were collected for items borrowed by the library and items lent, with a subdivision as to returnable and nonreturnable items lent in order to obtain some measure of photocopying activity in interlibrary loan operation.

In this survey, library operating expenditure items were requested both as actual expenditures in 1967-68 and as budgeted expenditures in 1968-69. The request for budgeted expenditures was included as an experimental item to obtain current financial data. Many libraries failed to report budgeted expenditures, and a complete analysis of those budgeted expenditures which have been reported will not be possible until actual expenditures for the same year are available from the next survey.

In addition to actual expenditures for 1967-68, each library was asked to report the estimated cost of items which, though not charged to the library's accounts, constituted library materials or services. These included automation services provided by the institution's centralized computer installation without charge to the library, student assistance in the library under the work-study program of the institution, free binding services at the institution's printing plant, etc.

In computing total operating expenditures as a percent of total institutional expenditures for educational and general purposes, the latter figure encompasses all expenditures made by the institution for instruction, departmental research, and organized research.

Professional librarians are defined as staff doing work that requires training and skill in the theoretical or scientific aspect of library work, as distinct from its mechanical and clerical aspects.

Other professional staff are personnel who, though not professional librarians, are in positions normally requiring at least a bachelor's degree.

Nonprofessional staff are personnel who perform receiving, shipping, storing, and secretarial duties and similar personnel (excluding maintenance personnel) whose duties do not require a knowledge of the theory of library work.

In reporting salaries of full-time staff, by position, respondents were given the option of restricting the publication of their salary figures in this report. Consequently, Table 5 contains the notation "R" in any cell in which the library indicated that the salary be restricted. Inasmuch as libraries with relatively high salaries tend to impose the restrictions more often than those with low salaries, it is important for budget-making purposes to utilize not only the salary data but also the relatively unselected data on expenditures for salaries in Tables 2 and 3.

For the beginning salary of a library school graduate, the respondent was asked to report the salary which the library was actually paying, during the Fall term 1968, to a librarian with a fifth-year degree and without experience. In previous surveys, the respondent was asked to report the beginning salary he was paying or would pay. A study of the returns indicated evidence of overstatement of the salary which would be paid to a beginning librarian if one could be recruited. Therefore, in the present survey, beginning salaries are shown only for those librarians who are actually working during the current term.

22. HEADS OF MAJOR LIBRARY UNITS																	
23. OTHER PROFESSIONAL LIBRARIANS																	
24. PROFESSIONAL STAFF OTHER THAN LIBRARIANS																	
25. NONPROFESSIONAL STAFF																	

*MEAN SALARY FOR EACH LINE = SUM OF ACTUAL SALARIES (OR EQUIVALENTS) DIVIDED BY SUM OF PERSONNEL ON THAT LINE.

EXPLANATIONS AND INSTRUCTIONS

In this form, basic data are requested on the collections, staff, expenditures and salaries in college and university libraries. The compilations of these data have proved to be valuable tools for administrators, chief librarians, and others concerned with the improvement of library services to higher education. The data will also assist in the administration of Title II of the Higher Education Act of 1965.

The following changes have been made in the procedure and questionnaire since last year:

A. **Reorganization:** All data concerning the library have been consolidated into one form.

B. **New Items:**

1. Statistics on PROJECTED EXPENDITURES IN 1967-68—in order to provide more up-to-date information.
2. Statistics on INTERLIBRARY TRANSACTIONS.

C. **Omitted Items:**

1. Analysis of resources
2. Library facilities
3. Library's classification scheme

GENERAL INSTRUCTIONS

- A. **TIME PERIODS COVERED.** The data concerning library collection and transactions (Part I) and actual expenditures and hourly assistance (Part II) should be reported for your fiscal year 1967-68. The items concerning budgeted expenditures (Part II) are for fiscal year 1968-69. Expenditure data in Part III are for your institution's fiscal years 1967-68 and 1968-69. Data on staff (Part III) and salaries (Part IV) are for the fall term 1968.
- B. **LIBRARY UNITS COVERED.** Report consolidated data for ALL of the library units in your college, university, or university system, including libraries in branches, extension centers, and research installations. If it is necessary to omit any library unit(s), please give name and location in Item 5.
- C. **NEED FOR ESTIMATES.** If exact information is not available for an item, PLEASE ENTER AN ESTIMATE for the requested figure. If data are available for a combination of items but not for each component, enter an estimate for each component. Thus, except for the salary table (Part IV, Lines 11-25), each item on the form should show (a) an appropriate figure, (b) an "X" for check boxes, or (c) "O" when the quantity to be reported is nothing or zero; DO NOT LEAVE ANY ITEM BLANK.
- D. If you have questions or need more copies of the form, please phone Mrs. Doris Holladay, Area Code 202, 963-7708.

SPECIFIC INSTRUCTIONS

PART I - LIBRARY COLLECTION AND TRANSACTIONS, 1967-68

- A. For reporting purposes, a **VOLUME** is a physical unit of any printed, typewritten, handwritten, mimeographed or processed work contained in one binding or portfolio, hardbound or paper bound, which has been classified, cataloged, or otherwise prepared for use. Include bound periodical volumes. Include Government documents that have been classified and cataloged, counting as a volume such material as is contained in one binding or portfolio.
- B. All forms of microtext (including microfilm) are to be excluded from Lines 1-4, but ARE TO BE REPORTED SEPARATELY on Lines 5 and 6. If the number of reels or other units of microtext are not separately available in your records, please estimate their number for purposes of providing separate data here.
- C. For Line 7, a **PERIODICAL** is defined as a publication issued in parts that usually contain articles by several contributors. It generally has a distinctive title and the successive numbers or parts are intended to appear at stated intervals, and usually for an indefinite period. Other serials, such as monographs, newspapers, annuals, proceedings, transactions, yearbooks, and reports, should be reported on Line 8.

PART II - LIBRARY OPERATING EXPENDITURES, ACTUAL 1967-68 AND BUDGETED 1968-69

- A. In order to provide current data, expenditure items are being requested both for actual expenditures in 1967-68 and for budgeted expenditures in 1968-69, for the institutional fiscal year.
- B. In the budgeted figures, include any funds, the receipt of which may not be certain but can plausibly be anticipated in 1968-69.

- C. On Line 1, include expenditures for salaries, before any deductions, of professional and nonprofessional staff of the library. Staff benefits, such as social security, retirement, pension contributions, and other "fringe benefits" paid by the institution should be excluded. Also exclude bindery salaries and wages (see Paragraph E).
- D. The estimated value of personal services (salary equivalents) contributed by members of religious orders should be included on Line 2.
- E. If your library operates its own bindery, report on Line 5 the total expenditures for this operation, including those for salaries, wages, and supplies.
- F. Note that Lines 8 through 10 provide for the estimated value or cost of certain materials or services which are not included in your library's budget. On Line 10, specify other types of services, such as, students working for part-payment of tuition or other hourly help under programs charged to the institution's budget.

PART III - GENERAL INSTITUTIONAL DATA

- A. Note that the information required in this Part is concerned with the entire institution. However, it is needed in the analysis of library data and will expedite final publication if supplied here.
- B. Figures for Items 1 through 5 should be obtained from the business officer and the chief academic officer, respectively.

PART IV - LIBRARY STAFF AND SALARIES, FALL TERM 1968

SECTION A - TOTAL LIBRARY STAFF

- A. In this section report all staff (including contributed-service staff) serving the library in regular positions, i.e., full-time or part-time positions functioning during at least the fall term.
- B. For reporting purposes, **PROFESSIONAL LIBRARIANS** (Lines 1, 2, and 3) are defined as staff doing work that requires training and skill in the theoretical or scientific aspect of library work, as distinct from its mechanical or clerical aspect. Note that the group designated "Heads of major library units" (Line 2) includes head of school, college, or branch libraries and heads of major library departments or divisions.
- C. **PROFESSIONAL STAFF OTHER THAN LIBRARIANS** are defined as persons who, though not librarians, are in positions normally requiring at least a bachelor's degree (line 4).
- D. **NONPROFESSIONAL STAFF** are persons in receiving, shipping, storing, secretarial duties, etc. (Line 5).
- E. To compute the full-time equivalent (FTE) of the part-time staff reported in Column (c), add the hours worked in a typical week by all regular part-time staff, and divide by the number of hours in your full-time work week; round to nearest tenth of a position, and enter the result in Column (d). Complete Column (e) (FTE of total staff) by adding Columns (b) and (d). NOTE:—Hourly employees who work only intermittently should be reported in Part II, Line 12.
- F. As appropriate, use a similar procedure to obtain, in terms of full-time equivalents, the components of Column (e) that are represented by contributed-service staff and enter this figure in Column (f).

SECTION B - SALARIES OF FULL-TIME STAFF

- A. This section requests salary data for all **FULL-TIME** library staff members who, at the beginning of the fall term 1968, held contracts for periods of at least 9 months. Exclude staff serving full time for less than 9 months. The definitions in Section A for types of position also apply here.
- B. Report salaries in terms of contract salaries before deductions. Staff on 9-10 month and 11-12 month contracts should be entered, respectively, in tier A and tier B of the table. Estimate salary equivalents of contributed-service staff members (equating them to an 11-12 month rate) and report them in tier C.
- C. For staff reported on each line of the table, compute the *mean* salary (Column (b)) by summing the salaries and dividing by the number of staff in Column (c).
- D. If your institution wishes to restrict the use of salary data for a particular type of position to summary tabulations, enter an "X" on the appropriate line in Column (g) of the salary table.
- Note that the salary of the director of libraries is to be reported separately (Item 7), and that use of his salary will be restricted if you so specify in Item 9.
